

## **SProSIG Officer Nomination**

Send this completed form together with a resume or curriculum vitae to Keikichi Hirose [hirose@gavo.t.u-tokyo.ac.jp] by July 26, 2024.

**Name of nominator (if not self nomination):**

**Name of nominee:** Katalin Mády

**Affiliation:** HUN-REN Hungarian Research Centre for Linguistics, Budapest, Hungary

**Home page address:**

*official:*

<https://nytud.hu/en/colleague/katalin-mady/profile>

*current research project:*

<https://nytud.hu/en/tender/prosodic-structure-and-sentence-types-by-using-large-speech-databases-supported-by-deep-learning-techniques>

*downloadable publications and course materials:*

<https://phon.nytud.hu/mady>

**Statement of qualifications and vision (200 words or less):**

My research includes both micro- and macroprosody: vowel quantity in production and perception; stress, accent and focus realisation; acoustic modelling of intonation patterns. While most of my studies are based on Hungarian, other research includes comparative and monolingual studies on German, English, Czech, Slovak and the endangered Uralic language Tundra Nenets. Research on lesser studied languages will hopefully contribute to a better understanding of prosodic typology in general.

As an officer for SProSIG, I would like to expand the visibility of the group's activities and reach out for researchers who might not be aware of the SProSIG mailing list and the online lecture series. This includes scholars who do not (regularly) attend the Speech Prosody conferences for various reasons (lack of time or funding). Some of them might want to be informed about other prosodic workshops and conferences which can serve as a platform for an exchange with other researchers working on the prosody of their target languages or similar ones. If elected, I would be happy to participate in keeping up the mailing list both in terms of memberships and announcements.
